A new approach to health and social care provision — tackling the problem of ever-increasing demand for care provision

IG DEMAND ON FILE

Empowering the person

Integrating services

Supporting the clinician

Managing the system effectively (and eliminating waste)

Key Partners

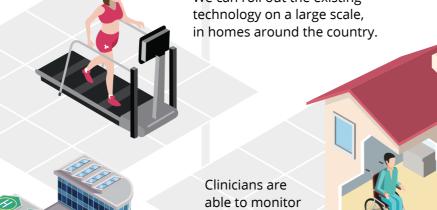

NHS-D NHS-i NICE

Current NHS themes and partners

Existing technology, such as telecare, technologyenabled systems, business intelligence and data analytics can be used to identify trends.

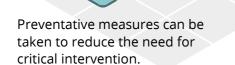

We can roll out the existing

patients remotely.

The necessary technology is

already available - and the

trends are evident

Mastek and partners roll out the technology on a large scale

Welcome to the health dome

Our dome concept for assisted living will quickly identify issues and single them out for action, speeding up the whole process.

Using physical spaces that you provide in the community, Mastek, working with partners, facilitate the provision of services within.

Real people are using the facilities.

Suppliers and government both invest.

together multiple funding streams to tackle crossdepartmental issues.

A panel brings

Different rooms reflect real-world situations, designed around real-life patient journeys and not point solutions.

Suppliers bid for places and get a 3-6 month trial period. Technology is showcased and tested for integration and usability. Proactive intervention

before

a health crisis arises
will reduce pressure
on care service

Harnessing technology trends as your solution aggregator, we will support adoption of a preventative care strategy, saving billions of pounds and more importantly, **IVES!**

Enabling behaviour change towards

self care

Nationwide 'healthcare trial domes' set up to test, prove and speed up the roll-out

Benefits going forward
